Email: sales@bandctech.com

We started B&C Technologies with one goal in mind. To provide the highest quality laundry equipment at an affordable price. We started out with less than 10 machines and since that time we have worked hard to offer the largest variety of equipment to meet most laundry needs. Now with over 100 different products available we are the laundry solution. We strive to continue to be pioneers with our innovative products and technologies that have helped us to become industry leaders.

In addition to the high standards we have set for our equipment, we have also set those same high standards for ourselves. We have built a foundation on innovation, dependability, and a set of solid values that have guided us and allowed us to build a strong, talented team. We are excited about the future growth of B&C Technologies as we strengthen our industry position. As we continue to grow we will maintain the family atmosphere and close, personal relationships that set us apart. Welcome to the B&C family.

Pictured above, the B&C Technologies ownership families. Seated, left to right: Mats Bruce, Catharina Whitehead, Bengt Bruce. Standing, left to right: Gary Cowen, Bob Cowen, Bobby Cowen.

One Single Source One Comprehensive Line

Built to last. That's the first requirement for any B&C machine. Add affordability, reliability and the highest quality components and you have the foundation of this industry leader. Our machines are engineered and tested to withstand the most rigorous demands of any laundry. We know that exceeding industry standards doesn't have to be expensive - that's why we offer a high end product with a low cost of ownership. Affordability meets durability.

Engineering Driven

Our experienced staff of engineers is available to help make sure that your next project is a success. With our extensive experience in the industry, we can assist you in choosing the appropriate equipment for your specific need. Best of all, this experience is only a phone call away. When you call us you will immediately speak with someone that can help you. No more endless circles and wasted time caught in someone's voicemail system.

Customer Focused

The dynamics of a family owned company differ widely from the run of the mill corporate companies that are so common. We understand the importance of personalized service. We value our customers and strive to provide unsurpassed customer service. At B&C we make it our business to look out for your business.

B&C offers the lowest cost of ownership while maintaining the highest industry standards. Call or visit us online www.bandctech.com to see how you can benefit from the most dependable line of equipment offered in the industry.

The Washer-Extractor Line From B&C Technologies

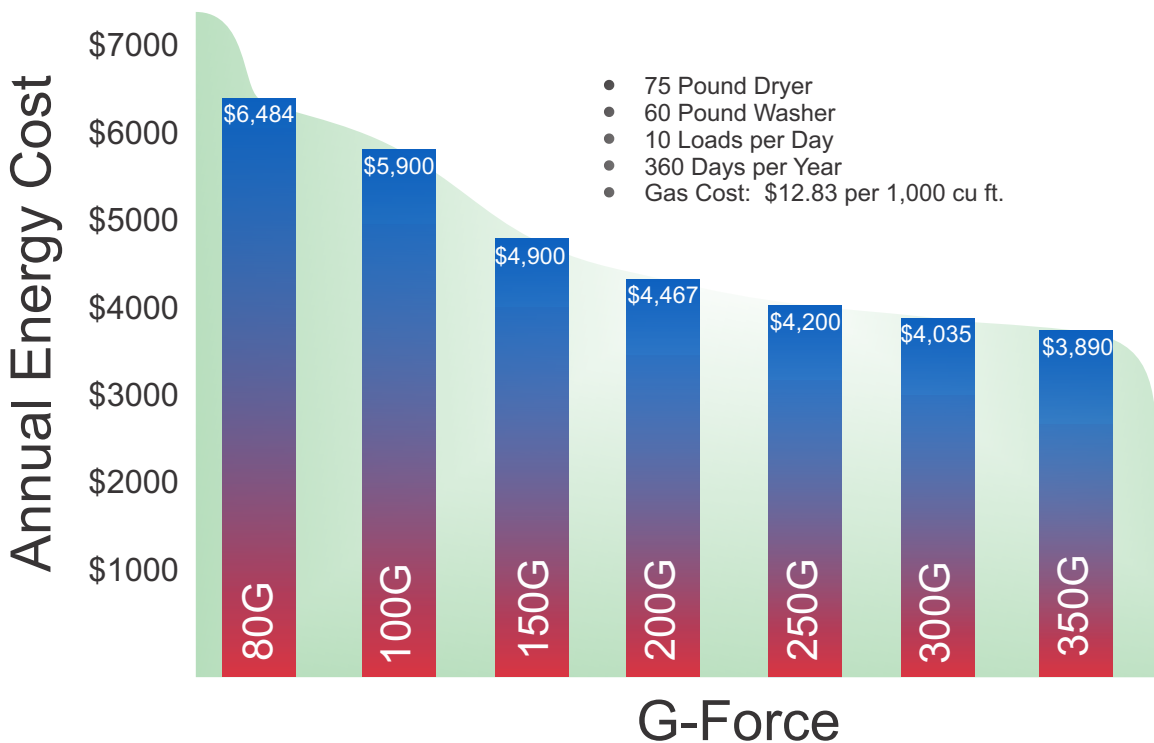

Outstanding Reliability and Efficiency at an Affordable Price

The B&C Technologies line of washer-extractors are designed to be effortless and powerful while maintaining a low cost of ownership. Our entire line saves you money over the life of the machine. In addition to a low initial investment, our machines have fewer parts. Fewer parts mean fewer things to break, which leads to less down time for the equipment and fewer repairs.

Higher extraction equals less time in the dryer which reduces energy consumption and increases savings, as shown in the graph below. The savings start with machines that are designed to be easily installed. Your laundry can be up and running in hours instead of days.

Our machines are engineered with the finest components to ensure a longer lasting machine. Our inverter driven single motor design offers flexible operation, precise speed control and verified motor protection. Every component that comes into contact with the wash solution is 304 (18/8) Stainless Steel. The entire B&C Technologies line features our proven frame design, the strongest in the industry. The backbone of any machine is the frame and ours is designed and tested to stand the true rigorous demands of continuous operation in your laundry.

B&C Washer-Extractors: Reliable, Efficient, Affordable.

HE Series

Hardmount Medium Speed Economy Washer-Extractors for Small to Medium Sized General Laundry Applications, Including Health Care, Hospitality and Correctional Facilities.

Outstanding Reliability and Efficiency at an Affordable Price

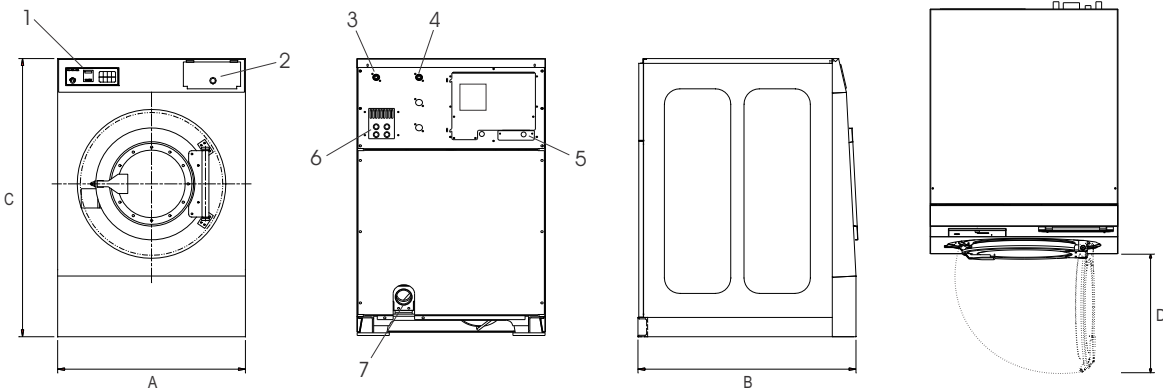

The HE Series:

- ◆ 35, 45, 65, 85, and 110 pound capacities
- ◆ 200G extraction equals less time in the dryer
- ◆ Controls are simple to use and easy to program
- ◆ 4 compartment supply dispenser for liquid and dry chemicals
- ◆ 4 connections for automatic chemical injection
- ◆ Easily moved with a pallet jack while on or off of the skid
- ◆ Large door opening for easier loading and unloading
- ◆ Strong door and hinge system made of 304 stainless steel
- ◆ 5 degree lean back for lower bearing loads and less vibration

HP Series

Hardmount High Speed Professional Washer-Extractors for General Laundry Applications, Including Health Care, Hospitality and Correctional Facilities.

Outstanding Reliability and Efficiency at an Affordable Price

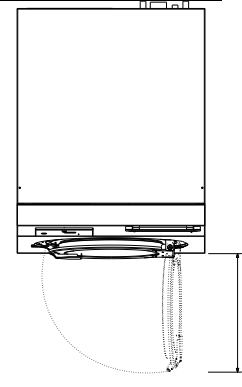

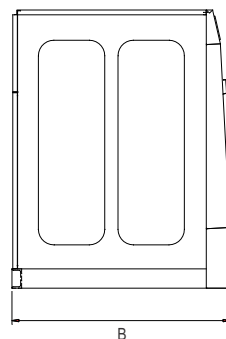

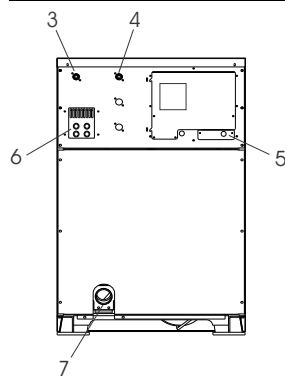

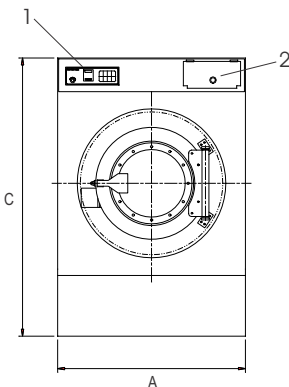

HP-65

The HP Series:

- ◆ 65 or 125 pound capacity
- ◆ Up to 300G extraction equals less time in the dryer
- ◆ Powerful and easy to use control with unequaled flexibility
- ◆ 8 connections for automatic chemical injection
- ◆ HP-65 easily moved with a pallet jack while on or off of the skid
- ◆ Optional through the door spray rinsing system on HP-65
- ◆ Strong door and hinge system made of 304 stainless steel
- ◆ HP-65 features CARB bearing system for outstanding reliability
- ◆ HP-125 features industrial strength pillow block bearing system
- ◆ 5 degree lean back for lower bearing loads and less vibration

SI Series

Softmount High Speed Industrial Strength Washer-Extractors for Medium to Large Sized On Premise Laundry, Commercial and Industrial Laundry Applications, Including Resort Hospitality, Health Care, and Correctional Facilities

Outstanding Reliability and Efficiency at an Affordable Price

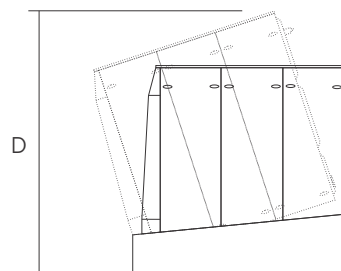

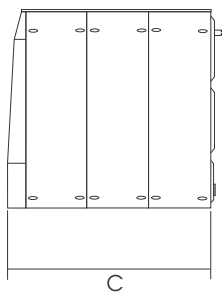

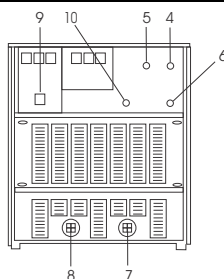

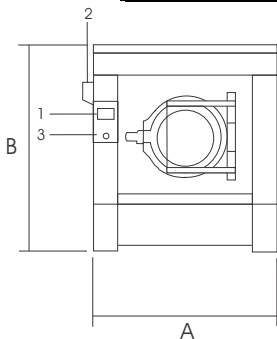

The SI Series:

- ◆ 110, 135, 200, 275, and 300 pound capacities
- ◆ 320G extraction equals less time in the dryer
- ◆ Powerful and easy to use control with unequaled flexibility
- ◆ 5 compartment supply dispenser for liquid and dry chemicals
- ◆ 8 connections for automatic chemical injection
- ◆ Large door opening for easier loading and unloading
- ◆ Strong door and hinge system made of 304 stainless steel
- ◆ Dry zone bearings are not damaged should seals leak
- ◆ 3 degree lean back for lower bearing loads and less vibration

SB Series

Softmount Barrier Washer-Extractors for Small, Medium, and Large Sized On Premise Laundry Applications Where Hygiene is a Major Concern, Including Health Care and Clean Room Operations.

Outstanding Reliability and Efficiency at an Affordable Price

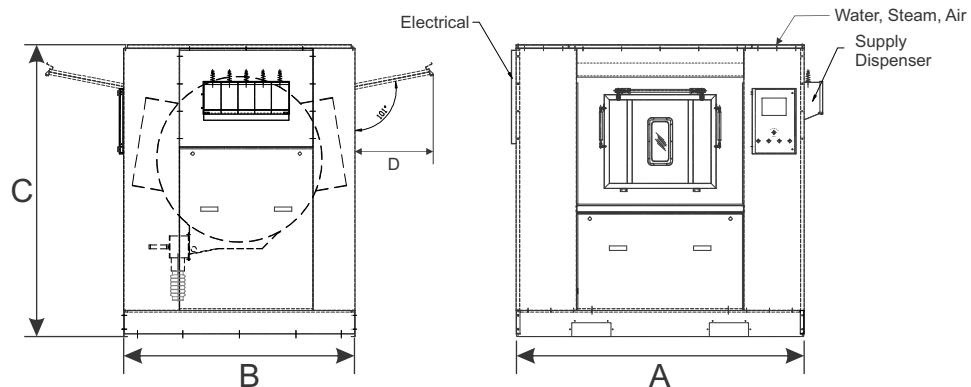

The SB Series:

- ◆ 60, 80, 155, 225, 300, and 485 pound capacities
- ◆ Designed to be built into the wall separating the clean and soiled sides of the facility
- ◆ 350G extraction equals less time in the dryer, yielding tremendous savings
- ◆ Powerful and easy to use control with unequaled flexibility
- ◆ SB-60 and SB-80 are open pocket

Water Washing / Wetcleaning From B&C Technologies

SP-65

SP Series Washer (45,50,65,75,110,135,165,195 lb capacity)

Complete flexibility in your laundry. The SP Series allows you to go from standard laundry to wet cleaning in the same machine. There is no need to invest in a special wet clean only machine. The EL6 control allows finely programmable water levels, temperatures, agitation times, and extremely slow wash speeds that will not damage delicate articles.

DE Series Dryer (30,50,75,120,170,190 lb capacity)

Overdrying can damage or shrink fabrics; a moisture sensor minimizes that possibility. B&C Technologies dryers equipped with the optional moisture sensor can save an additional 15% on energy costs over standard timed drying. The B&C system precisely measures the remaining water left in the goods and stops the drying process when they are dry. This saves time, money, and wear.

- Less wear and tear on goods
- Lower energy costs
- More loads per week
- Automatically adjusts to different sized loads
- Excellent for wetcleaning

DE-75

TS-93 Cabinet Dryer, 32lb drying capacity

TS-63 Cabinet Dryer, 20lb drying capacity

Where does all the lint come from? Many modern garments include a do not tumble dry label on the tag. Tumble drying is an efficient drying process, but it prematurely wears the clothes through friction and mechanical action. A B&C Technologies drying cabinet is the perfect solution for drying water washed goods. Drying cabinets dry the goods without any mechanical action allowing for virtually no wear and tear on the goods. Humidity Tracking System (HTS) plus programmable time and temperature ensure perfect results. Large internal racks allow for maximum capacity.

TS-63

BioSpin Ozone System From B&C Technologies

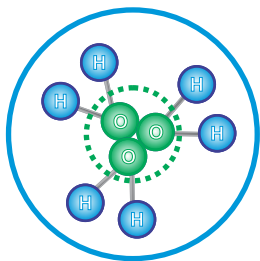

The savings at B&C continue with our ozone system. The BioSpin Ozone system offers benefits through less chemical usage, less hot water usage, shorter cycle times and improved life of linens. Ozone is a bleaching and sanitizing agent that leaves lightly soiled laundry fresh and sanitized using a simple wash process that doesn't use hot water. Since there is no chlorine bleach used in ozone wash programs, rinsing and souring are minimized and only a small amount of pH neutral detergent. Process times, hot water, and chemical usage can be greatly reduced.

BioSpin and B&C Technologies: Environmentally and Economically Sound.

How the system works:

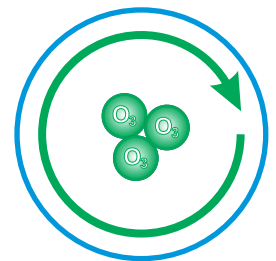

1. The BioSpin Electrolytic Ozone Generator creates high purity ozone directly from water.

2. High purity ozone is dissolved into the water using a patented mixing pump to create ultra concentrated ozonated water.

3. Ultra concentrated ozonated water is mixed with cold tap water and fed into the washing machine.

4. Ozone is replenished between wash fills and stored for use in the next wash cycle.

The Dryer Line From B&C Technologies

Outstanding Reliability and Efficiency at an Affordable Price

To complement our line of superior washer-extractors, B&C Technologies offers the most rugged dryers in the industry. A low initial investment is only the beginning of your savings. All B&C dryers are manufactured with fewer parts which means fewer break downs, less downtime and less maintenance. Easy installation saves you money and time so you can have your laundry up and running in a matter of hours. Engineered and manufactured with installation in mind, these sturdy dryers use welded steel cabinets and heavy duty steel bases that can be easily moved without damaging the machine.

The B&C line features an energy saving, fully enclosed, insulated cabinet. This leads to much quieter operation as well as keeping the heat in the dryer where it belongs. High airflow rates and high BTU burners dry the goods quickly for increased productivity in the laundry.

Our durable drive system is built to last. Fan cooled motors, cast iron pulleys, plus a standard stainless steel drying cylinder make the B&C line of dryers the best value in the industry.

Never waste time and money over drying your goods again. Humidity sensing is available on all machines that are equipped with the microprocessor control.

Even the doors are designed for ease of use and long life. Doors swing open 180 degrees for increased accessibility. Maintenance on the B&C dryer door is reduced by our service free magnetic latch. You'll find exactly what fits your drying needs.

The B&C Dryer Line: Efficient, Affordable, Rugged.

The B&C Technologies humidity sensing system measures the moisture in the exhaust as it leaves the dryer. Our system uses a sensor which is mounted in the exhaust duct of the dryer to measure the moisture left in the goods. It is a simple, reliable, and accurate way to measure remaining moisture, prevent over drying, and prevent damage to delicate goods or handle special processes like wet cleaning. Unlike our competitors, the B&C system is accurate and repeatable, saving time and money in your laundry.

DE Series

Economy High Efficiency Dryers for General Laundry Applications and Small to Medium Sized On Premise Laundries Including Hotel/Motel, Healthcare, Athletics, and Drycleaners.

Outstanding Reliability and Efficiency at an Affordable Price

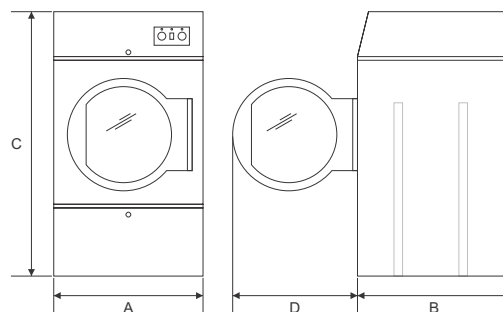

The DE Series:

- ◆ 30, 50, 75, 120, 170, and 190 pound capacities
- ◆ Standard dual timer control, microprocessor optional
- ◆ Steam, gas, or electric heat provides smooth and even heat
- ◆ Easy to clean lint compartment
- ◆ Standard reversing cylinder on DE-120, DE-170 and DE-190
- ◆ Steam damper system on DE-120, DE-170 and DE-190
- ◆ Advanced corrosion resistant coating
- ◆ Easy to maintain
- ◆ Stainless steel drying cylinder standard

The Drying Cabinet Line From B&C Technologies

Modern design and efficiency at an affordable price

Europeans have been using drying cabinets for over fifty years both professionally and domestically as a complement to standard tumbling clothes dryers. Now available in the Americas, drying cabinets are proving to be indispensable for goods that can not be traditionally dried.

The drying cabinet dries efficiently without mechanical action at exactly the right temperature and humidity. Studies show that 20-30% of garments worn daily should not be tumble dried as many show a do not tumble symbol on the care label. A drying cabinet is ideal for articles not suitable for tumble dryers as well as special processes like wetcleaning. Gentle drying action leads directly to longer fabric life, as the goods are not tumbling against each other or against the drying cylinder.

Drying cabinets have a much longer life span than conventional tumble dryers due to very few moving parts. B&C drying cabinets feature sturdy construction and excellent engineering which leads to extended machine life. New controls and fan systems have made the cabinets highly energy efficient, creating lower energy costs.

Flat packaging saves shipping costs and reduces shipping damage. Manual or automatic drying modes with accurate temperature sensing and our unique humidity tracking system (HTS) prevents over drying and saves energy. Underpressure drying technology creates a partial vacuum by utilizing three fans which speeds drying time and lowers energy costs.

B&C Technologies has an exceptional line of professional drying cabinets designed for many different markets and custom marketplaces. The combination of decades of experience and our new technology makes our drying cabinets an excellent alternative and complement to tumble dryers.

TS-63

Medium Sized Drying Cabinet for Efficient Hang Drying of Delicate Garments that should not be Tumble Dried. Perfect for Drycleaners, Wetcleaners, Theaters, Ski Resorts, Daycare Centers and more.

Outstanding Reliability and Efficiency at an Affordable Price

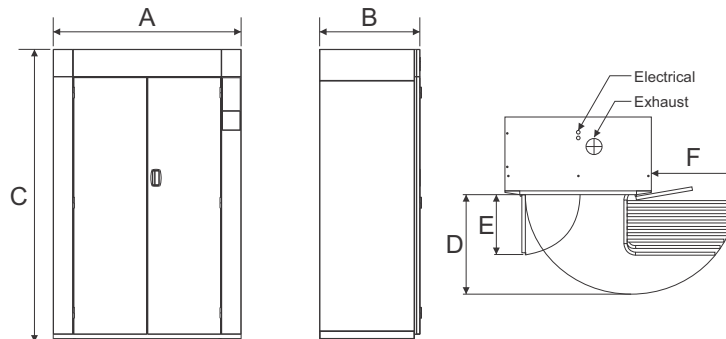

TS-63

The TS-63:

- ◆ 20 pound capacity
- ◆ Swing out hanging rails with 50 feet of hanging length
- ◆ Optional single hanging bar
- ◆ High temperature programs, up to 195°F, greatly reduce bacterial contaminants and allergens
- ◆ Electric heating
- ◆ Microprocessor control with manual and automatic modes

The Ironer Line From B&C Technologies

Outstanding Reliability and Efficiency at an Affordable Price

The B&C line of ironers provides you with outstanding performance at the lowest price. Increased efficiency, fewer parts, and low maintenance help save you money.

The robust, energy efficient inverter drive system allows for incredibly flexible operation and excellent protection for the motor. By using the latest technology our drive system provides precise speed control and soft starting which reduces stress on critical components.

Our easy to use controls are designed to provide accurate temperature regulation and can be adjusted at any time.

Nomex padding and belts are long lasting and impervious to the high temperatures found in the ironing environment. The heavy duty steel frame gives our ironer strength and durability.

The operator's safety is of utmost importance. We ensure a safe to use machine by utilizing industry standard safety features such as circuit protection, emergency stops located around the machine and interlocked panels.

The B&C Ironer Line: Powerful, Dependable, Affordable.

There is no substitute for the luxurious appearance and feel that crisply ironed table linens, napkins, pillowcases, and sheets provide. Ironed linens convey a message of first class quality and cleanliness. Linens that are only tumble dried give the impression of previous use by an earlier guest.

IP Series

Compact Economy Ironers for Small to Medium Sized General Laundry Applications Demanding High Standards of Linen Quality. Perfect for Hotels, Health Care, and Party Rental.

Outstanding Reliability and Efficiency at an Affordable Price

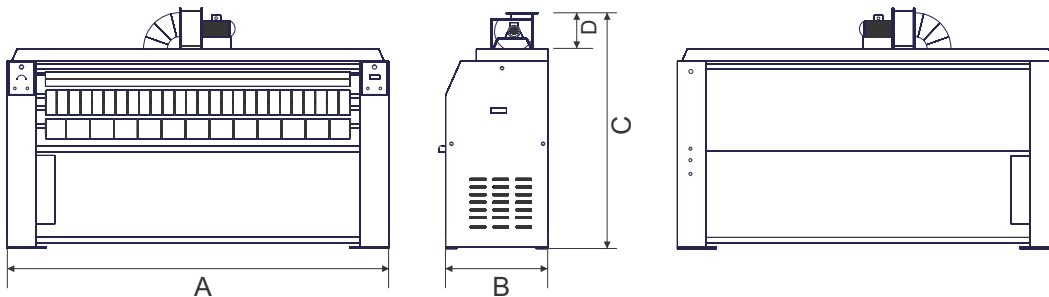

The IP Series:

- ◆ 78, 85, and 100 inch working width, 14 inch diameter roll
- ◆ Steam, gas, or electric heating
- ◆ Chrome plated ironing cylinder - waxing not required
- ◆ Digital temperature and speed controls
- ◆ Jog forward/reverse
- ◆ Full exhaust canopy with external blower
- ◆ Perfect for napkins, pillowcases, and more
- ◆ Goods return to operator

The Feeding and Folding Lines From B&C Technologies

Modern Design and Efficiency at an Affordable Price

B&C Technologies is there for your laundry needs from beginning to end. We take you step by step starting with our line of economical, high efficiency washers, then to our powerful line of dryers and drying cabinets, on to our unsurpassed single roll and multi roll deep chest ironers and finally to our dependable feeders and folders. Using only the highest quality components, our finishing equipment is designed to produce outstanding results and long life. We designed our machines with simplicity in mind, keeping our equipment user friendly and easy to maintain. This allows for savings of both training time and repair costs. We know there are varying demands of laundries - that is why our feeders and folders offer versatility. Our ergonomic, user friendly design allows for stress free operation. The incredible speed of our line of folders allow you to increase your productivity while maintaining high quality output. Folding equipment from B&C Technologies gives your goods a perfect finishing touch.

PF Series

Small Piece Precision Folder that Folds, Sorts, and Stacks a Wide Variety of Small Goods Including Towels, Hospital Gowns, Garments and Other Flat Goods.

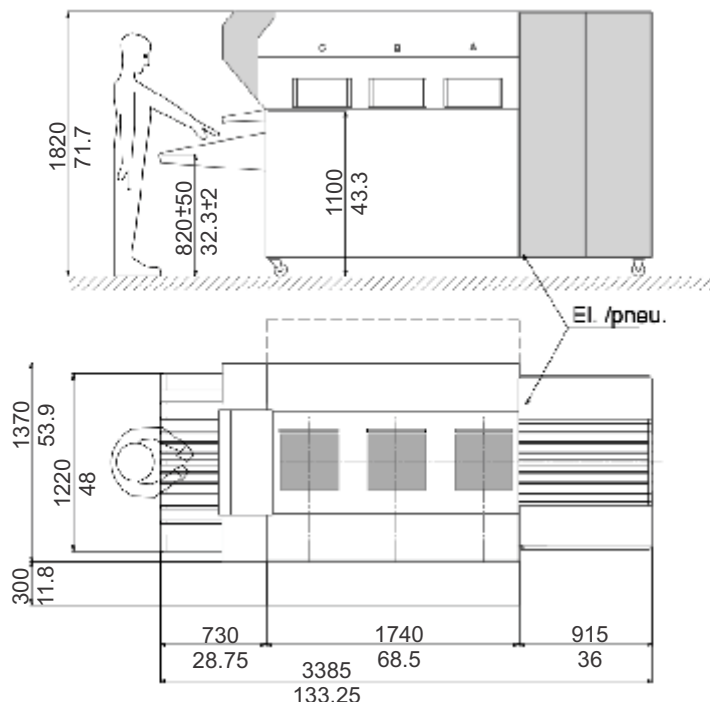

Outstanding Reliability and Efficiency at an Affordable Price

The PF Series:

- ◆ Folds with air blasts or optional knives
- ◆ Optionally sorts and stacks according to size
- ◆ Automatically adjusts for different widths
- ◆ Optional conveyor system
- ◆ French folds with one, two, or no crossfold
- ◆ Can fold all goods the same width via programming
- ◆ Wheels for easy mobility
- ◆ 100 available programs

PF-3

Technical Specifications:

Electrical Connection:

230V, 3ph, 60Hz, 15A breaker
460V, 3ph, 60Hz, 15A breaker

Pneumatic Connection:

100 psi / 7 bar
1/2" / 13mm connection
4 CFM / 6 cubic meters/hr

Weight:

2800 lbs
1280 kg

PS Series

Precision Sheet Folding In One, Two, or Four Lanes with or without Crossfolding for Precise Folding of Sheets and other Goods from an Ironer.

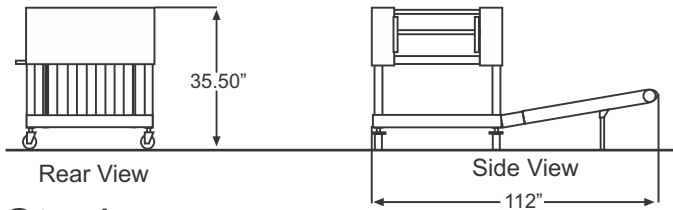

Outstanding Reliability and Efficiency at an Affordable Price

The PS Series:

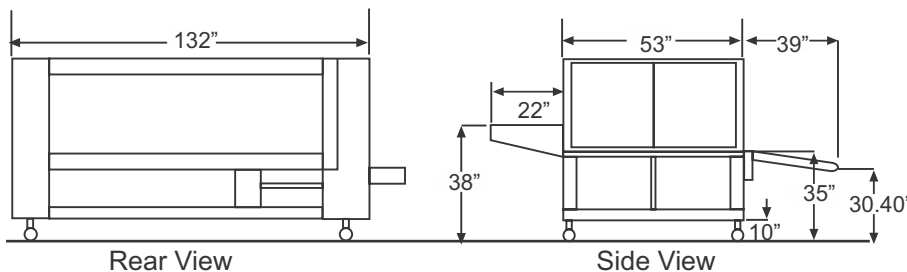

- ◆ 1, 2, or 4 lanes available
- ◆ Optional Stacker
- ◆ Inverter driven
- ◆ Static bar
- ◆ 2 primary folds and 3 crossfolds
- ◆ Self centering crossfold plate
- ◆ Powerful control with built in diagnostics
- ◆ Simple and elegant design

Product Testimonials

B&C Technologies

"Our SI-275 is absolutely the best machine we have. I wish I had more of them to replace all of my existing machines. Thank you so much!"

Sal McGhee
Owner
Service Stars

"We used B&C Technologies in this hotel because we think that the technology is first class, world class. We think that B&C Technologies was the answer to what we have in our hotel as far as laundry systems are concerned."

Ali Meghji
Renaissance Hotel
Edmonton International Airport

"The equipment is a solid, cost effective and hassle free solution for our laundry needs and it stood the test of time; the last ten years we've had good performance out of the equipment for the people that have to use it every day."

Brooke Christianson
Vice President
Canalta Hotels

"Our B&C washers, dryers and ironer have given us many years of trouble-free operation and are strong and cost effective. As our laundry business has grown, we have added more B&C machines and now process only with B&C"

Vladimir Smoliakov - General Manager
System Laundry Management

Industries Served

No matter what industry you're in we have your laundry solution. Whether it's Healthcare, Fire Station, Hospitality, Agriculture, or Commercial Laundries, B&C Technologies has a line to suit any laundry need. We supply everything from washing machines to finishing equipment, for the smallest laundry to the largest. Since we provide the largest range of laundry equipment from a single supplier, you no longer have to go from place to place to equip your facility. We also offer laundry design services to help you build the most successful laundry possible. You can rely on B&C Technologies to be there every step of the way.

Service and Hospitality

Busy hotels don't have time for breakdowns. That's why we designed our machines to be trouble free. At B&C we know that fewer parts mean less things to wear out. Using less parts will reduce down time while increasing productivity. We also understand the need to save every dollar possible. Utilizing a higher G-force extraction leads to less time your goods need to spend in the dryer therefore lowering both energy and labor costs. Our machines are made to be user friendly. Easy to operate controls keep training time to a minimum so you can spend your time taking care of your guests. To complement each B&C washer-extractor, we have a rugged, economical dryer. Built with the same standards of quality and affordability, you can count on our dryers to keep your laundry running smoothly. Our complete line of finishing equipment makes your hotel and restaurant linens wrinkle free and truly finished.

You'll sleep well knowing we're taking care of the laundry.

HE-65

The HE Series:

- ◆ 35, 45, 65, 85, and 110 pound capacities
- ◆ 200G extraction equals less time in the dryer
- ◆ Large door opening for easier loading and unloading

The DE Series:

- ◆ 30, 50, 75, 120, 170, and 190 pound capacities
- ◆ Easy to maintain
- ◆ Stainless steel drying cylinder standard

DE-75

Firehouse

The clothes may not make the man, but a firefighter has to rely on his. Properly cleaned and dried turnout gear is critical for a firefighter. We want to help keep you safe with our line of washers and drying cabinets. We want you to know that your gear is as clean as possible without damage so all our Firehouse machines meet NFPA guidelines. Once your gear is clean it must be dried correctly and completely. The B&C drying cabinet protects your gear by using our patented humidity tracking system (HTS) to stop the drying process once the gear is completely dry. This ensures your gear is thoroughly dried while preventing unnecessary wear.

While you're working hard to protect others, you can rest easy knowing we're protecting you.

The HE Series:

- ◆ 35, 45, 65, 85, and 110 pound capacities
- ◆ 100G extraction meets NFPA standards
- ◆ Large door opening for easier loading and unloading

FC-20 Drying Cabinet:

- ◆ Dries 6 sets of turnout gear, boots, gloves and masks
- ◆ Specially designed for drying heavy duty overalls
- ◆ 6 ventilated hangers that help dry from the inside
- ◆ Meets NFPA standards

HE-65 Firehouse

FC-20

Healthcare

When you're busy caring for others you can't worry about how clean your laundry is. That's why we're here. B&C Technologies uses state of the technology to ensure that your laundry exceeds standards. Our barrier machines make it possible to keep soiled goods completely separated from clean. This will prevent blood born pathogens and other impurities from contaminating your clean laundry keeping your patients and you safer. Available BioSpin Ozone kills 99.9999% of bacteria and viruses, greatly reducing the possibility of infection from supposedly clean linens.

Let us take care of your laundry, you take care of your patients.

The SB Series:

- ◆ 60, 80, 155, 225, 300, and 485 pound capacities
- ◆ 350G extraction equals less time in the dryer
- ◆ Strong door and hinge system made of 304 stainless steel

The DI Series:

- ◆ 225, 325, and 475 pound capacities
- ◆ Optional 1 or 2 way tilting
- ◆ Vertical or Horizontal opening doors
- ◆ Pass through with rear chute

SB-225

DI-225

Dairy and Agriculture

The demands of a dairy farm can be tough. You need a washer that's just as tough. B&C washers are designed for demanding laundry applications. We utilize a solidly constructed frame to ensure our machines are sturdy and long lasting. Our line of washer-extractors will be able to keep with the busiest of farms. You can count on a B&C machine to get udder cloths clean and virtually dry so you don't have to slow down. Our softmount machines require virtually no foundation work so they can be placed where conventional hard mounts can't.

We think you'll agree - our machines are the cream of the crop.

The SP Series:

- ◆ 45, 50, 65, 75, 110, 135, 165, and 195 pound capacities
- ◆ 350G extraction - udder cloths can be used without drying
- ◆ Powerful easy to use control with unequaled flexibility
- ◆ 1 compartment supply dispenser for liquid and dry chemicals
- ◆ 8 connections for automatic chemical injection
- ◆ Easily moved with a pallet jack while on or off of the skid
- ◆ Large door opening for easier loading and unloading
- ◆ Strong door and hinge system made of 304 stainless steel
- ◆ Revolutionary CARB bearing system for outstanding reliability

SP-65

Athletics

Your team spills blood, sweat, and tears on the field, but you don't want it on their uniforms. B&C has that part covered. Our line of equipment will make sure your team looks their best when it's game time. We understand the high demands that sports uniforms place on laundry and we have machines that can meet those demands. Whether it's uniforms or towels we can have your laundry clean and fresh while saving you time and money. Our machines extract more water from the goods so they spend less time in the dryer and can have you back on the field sooner.

You cover the offense, we'll cover the laundry.

SP-65

The SP Series:

- ◆ 45, 50, 65, 75, 110, 135, 165, and 195 pound capacities
- ◆ 350G extraction equals less time in the dryer
- ◆ Large door opening for easier loading and unloading

The DE Series:

- ◆ 30, 50, 75, 120, 170, and 190 pound capacities
- ◆ Easy to maintain
- ◆ Stainless steel drying cylinder standard

DE-75

Drycleaning

Whether it's cotton or cashmere we can supply you with a line of equipment that gets clothes clean while saving money and time. Our line of high speed extract softmount machines can allow you skip the dryer with some goods. When you take a shirt out of a B&C machine it has the perfect moisture content to go straight from the washer to the press without conditioning. This allows you to save both money and time. For those cases when you do need a dryer we have a drying line to complement our high quality washers. Both are designed to be long lasting with few breakdowns. You don't have to worry about down time with our lines. Equipment from B&C will allow you get your customers clothes clean fast and do it economically. If you're considering wetcleaning, you won't need a separate machine as the B&C washer / dryer combination has you covered.

You make your customers look good, we'll make you look good.

SP-65

The SP Series:

- ◆ 45, 50, 65, 75, 110, 135, 165, and 195 pound capacities
- ◆ 350G extraction equals less time in the dryer
- ◆ Large door opening for easier loading and unloading

The DE Series:

- ◆ 30, 50, 75, 120, 170, and 190 pound capacities
- ◆ Easy to maintain
- ◆ Stainless steel drying cylinder standard

DE-75

Commercial Laundry

It's hard enough for most people to keep up with the demands of the family laundry. Families count their laundry by loads; you count yours by pounds. Most people can't comprehend having that amount of laundry to clean each day. We do. We also know that you don't have time to waste with machines that are down. All of our machines are designed to be simple to operate, long lasting, and economical. We designed our complete line to withstand the rigorous demands of a commercial laundry. We will be with you every step of the way. From our line of hard working washers, to our line of industrious dryers and finally our line of incomparable finishing equipment you can be assured that the processed goods will be clean and fresh.

A load in our machine is a load off your mind.

Industrial Laundry

It takes a lot of work to put out the amount of laundry an industrial laundry produces. You need machines that will work just as hard. At B&C we have a complete line to take you from the time you collect to the time you deliver. You no longer have to visit several vendors to equip your laundry. Our line of industrial washers are designed to help you increase productivity while lowering costs. High extract speeds lead to less dryer time and fewer parts lead to less downtime. This saves money on electricity, repair bills and keeps your laundry running faster. Our line of dryers and finishing equipment are designed with the same high standards as our washers. The economical to own, durable and efficient B&C equipment keeps up with the demands of continuous operation.

When you have a job that has rugged demands you need machines that are just as rugged.

Carwash

Our durable machines are built to withstand the rigors of the harsher environment present at a car wash. In addition to the rugged design, with a B&C washer you can save money on cleaning supplies. We offer the ability to impregnate cleaning cloths

with glass cleaner or many other cleaners so you no longer have to carry around spray bottles. No more wasted time refilling empty spray bottles, no more spills, no more lost bottles.

The easy to use machine saves you valuable time. Just put the towels in, select your program and press the start button. Your towels come out dry enough to use and your cleaning cloths are ready for action. This allows you to process more cars every day.

B&C Technologies - driving the savings to you.

SP-45

The SP Series:

- ◆ 350G extraction means no drying needed
- ◆ Large door opening for easier loading and unloading

The HE Series:

- ◆ 200G extraction leaves towels slightly moist
- ◆ Large door opening for easier loading and unloading

HE-35

Accounting and Office

The B&C accounting team has blended personal service with expertise to better care for our customers. Our skilled team works closely together to make sure B&C Technologies runs smoothly. Whether you have a question about accounts payable or receivable you can count on us to handle your request quickly and courteously. Order information, shipping quotes, and general information about B&C are a quick phone call or email away.

You'll always hear a friendly voice when you call B&C Technologies.

Engineering

B&C Technologies has put together a team of engineers that have vast experience in the laundry industry. All of our designs are engineering driven to maintain the highest standards and latest advances. The B&C Technologies engineering department was tantamount in the design of several different brands of machines that are still in use today. This wide range of experience make us ideal to help you find the machines that suit your laundry needs. Our expansive equipment line allows us to provide one stop shopping for all your laundry equipment needs. It doesn't end there. We offer laundry design services to help you easily get from the planning stage to a completed laundry quickly. Best of all, our customers have access to our engineers and can call to speak directly to us to get the help you need.

Production Team

The production team at B&C is responsible for every machine from the time it is ordered to when it leaves our warehouse. Before any machine is shipped out our team members perform full operational testing to make sure it meets our high quality standards. Each member of our team makes sure that quality is built into every stage of the process in order to ensure that waste is minimized and quality is maximized.

You can trust this group of trained professionals to ensure that your order gets personal attention and care.
